CAREER SUMMARY

I'm a passionate Junior Frontend Developer with over a year of experience, specializing in HTML, CSS, Bootstrap, JavaScript, React.Js and Redux. My expertise lies in enhancing user experiences through dynamic projects. I have practical experience in developing responsive UI components for Ecommerce platforms, collaborating closely with backend teams to ensure seamless functionality.I also have backend development experience using PHP, CodeIgniter and MySQL for multi-vendor projects. I'm enthusiastic about tackling new challenges and contributing to innovative frontend solutions.

WORK EXPERIENCE

Associate Software Engineer

Irax Tech Private Limited, Hyderabad **June 2023 - June 2024**

- Designed responsive pages showcasing products, utilizing HTML, CSS, Bootstrap framework and React.js for cross-device compatibility.
- Utilized Axios for API calls, fetching data to populate UI components and ensure real-time updates. Implemented authentication, form validations and state management with React.js Context and Redux, ensuring data integrity and security.
- Developed user interfaces in PHP (CodeIgniter) to send and store data in databases, adhering to MVC architecture for maintainability.
- Created RESTful APIs for seamless communication between frontend and backend systems, ensuring efficient data exchange.
- Actively participated in team meetings, code reviews and knowledge sharing sessions to enhance technical skills and domain knowledge.

Assistant professor

Annamacharya Institute Of Technology And Sciences, Hyderabad **June 2016 - June 2021**

I worked as an Assistant Professor in the H & S department, instructed physics courses to Engineering and Polytechnic students, employing innovative teaching methods to enhance comprehension and engagement. Collaborated with departments across the institution to integrate interdisciplinary approaches into coursework, fostering holistic learning experiences. Actively participated in departmental initiatives and faculty meetings, contributing insights and expertise to enhance educational practices.

TRAINING/CERTIFICATIONS

CCBP Nxt Wave Academy, Hyderabad **Nov 2021 - May 2023**

During my training at CCBP Nxt Wave Academy, I completed a Full Stack Development program where I gained proficiency in frontend technologies like HTML, CSS, Bootstrap and JavaScript, alongside backend technologies including Node.js, Express.js and SQL. I also mastered version control with Git and received certifications in Full Stack Development, demonstrating my ability to create dynamic, responsive and scalable web applications using a variety of tools and frameworks.

SKILLS

Frontend	:	HTML, CSS, Bootstrap, JavaScript, React.js & Redux, JQuery(Basic Level)
Backend	:	Python, Express, Node.js, Php, CodeIgniter
Databases	:	SQLite, Mysql, MongoDB(Basic level)
Other skills	:	Git & GitHub,VS-Code, Windows, BitBucket, Postman(Basic Level)

EDUCATION

Osmania University, Hyderabad   **2015**
Post Graduation - Physics, 6.79

Nizam College(Autonomous), Hyderabad   **2013**
Graduation - MPE(Mathematics, Physics & Electronics), 62%

PROJECTS

Project #1:

Name: Apnashope (Ecommerce Website)   **URL: https://apnashope.com**

Description: Designed and implemented various pages including Home page, Product lists, UserLogin, Rating & Reviews, Cart, Wishlist, MyOrders and Wishlist Pages using ReactJS and Redux.

Responsibilities:

- Developed UI using React.js, ensuring high performance and responsiveness across various devices and browsers.
- Utilized Redux for state management, maintaining a centralized store for application data and facilitating seamless interaction between components.
- Collaborated closely with backend developers for API integration into functional front-end components.

Role: Developer   **Technologies used:** HTML,CSS, Bootstrap, JavaScript, React Js & Redux

Project #2:

Name: shopersbay (MultiVendor Management System)   **URL: https://admin.shopersbay.com**

Description: Worked as Junior level developer on a comprehensive multivendor e-commerce platform featuring diverse modules, including content management, HRIS, units management etc. Built using PHP, CodeIgniter and MySQL the platform adhered to MVC architecture, ensuring scalability and maintainability.

Responsibilities:

- I worked on different modules including Orders in Sales for efficient order processing, Posts in CMS for dynamic content management, Customer in CRM for customer relationship management and Staff in HRIS for employee administration by using php-codeigniter.
- Developed complex SQL(MySQL database) queries to handle various operations such as order management, content storage, customer data management and staff administration.

- Integrated JavaScript & Jquery functionalities for enhanced interactivity and user experience, facilitating dynamic updates and real-time interactions within the application and For API calling.

Role: Developer   **Technologies used:** HTML,CSS, Bootstrap, JavaScript, JQuery, Php,CodeIgniter & MySql

Project #3:

Name: pothanna-portfolio-web (Personal Portfolio Website)   **URL: https://pothanna-portfolio-web.netlify.app**

Description: Designed and implemented various components including Home Component, About Component, Skills Component, Qualifications & Experience Component, Portfolio Component and Contact Related Component using ReactJS and CSS.

Responsibilities:

- Specializing in React.js, I create performant and responsive UIs that excel across devices. Utilizing media queries and flexbox/grid, I ensure optimal layouts and user experiences.
- Utilized React Hooks for managing component-level state within functional components like useState hook to store and facilitating seamless interaction between components.
- Used for leveraging JSX for markup, CSS for styling and React hooks for state management and side effects for DOM manipulation, rendered components conditionally based on state or props.

Role: Developer   **Technologies used:** HTML,CSS, JavaScript & React Js
